Subject: information

Hello Mr. Dobbs,

My webpage www.byronwine.com, in #13-V, has videos of six automobiles fueled with water, they use no gasoline. One video is a clip from a Japanese newscast, they have a water fueled minivan on the street. Some documents from my page are attached.

Mr. Dobbs, you could cause an immediate reduction in oil cost just by saying "I have seen videos of automobiles that are fueled with water".

Regards,

Byron Wine
