

Dear Bob, 02-18-83

I made you a copy FYI.

Don Novak

February 14, 1983

This is a personal invitation to attend the premier showing of the 21st Millennium Cruiser, a unique diesel-electric automobile that can travel more than 200 miles per gallon of fuel at a steady 60 miles per hour. A product of space age technology, this beautiful two passenger coupe combines advanced aerodynamic body styling with fuel efficient motive power.

This presentation, which is also open to the news-media, will be in the Sunset room of the Ambassador Hotel, 3400 Wilshire Blvd., Los Angeles, Ca., 11:00 am, Wednesday, February 23, 1983. This is the first opportunity for the international press corp to personally inspect and photograph the vehicle.

The public, as well as the news-media, is invited to attend additional showings at the same place from 10:00 am to 8:00 pm, Thursday and Friday, February 24th and February 25th.

There will be a crew of technicians to answer questions and provide information about this prototype car, which is the forerunner of a much more sophisticated four passenger model already on the drawing board.

In conjunction with the debut of the 21st Millennium Cruiser will be information concerning our filing a major class-action lawsuit involving a considerable number of giant American corporations within the automotive and petroleum industries, plus numerous branches and agencies of the U.S. Government responsible for regulating these companies. Our legal counsel will be present to answer questions about this class-action suit.

Sincerely,

Steven R. Reed
