Trans-Alaska Oil Pipeline*

*As Told to Dr. Clifford  
Wilson* Author of *Crash Go The  
Chariots* And 25 **Other Books**

## About the Author

*Lindsey Williams, who has been an ordained Baptist minister for 28 years, went to Alaska in 1971 as a missionary. The Transalaska oil pipeline began its construction phase in 1974, and because of Mr. Williams' love for his country and concern for the spiritual welfare of the "pipeliners," he volunteered to serve as Chaplain on the pipeline, with the subsequent full support of the Alyeska Pipeline Company.*

*Because of the executive status accorded to him as Chaplain, he was given access to the information that is documented in this book.*

*After numerous public speaking engagements in the western states, certain government officials and concerned individuals urged Mr. Williams to put into print what he saw and heard, stating that they felt this information was vital to national security. Mr. Williams firmly believes that whoever controls energy controls the economy. Thus, *The Energy Non-Crisis*.*

*Because of the outstanding public response that has been generated by this book, Lindsey Williams is in great demand for speaking*

*(Addition to the fourth printing of the second edition.)*

Chapter

# The Great Oil Deception

*There is no true energy crisis There never has been an energy crisis ... except as it has been produced by the Federal government for the purpose of controlling the American people.* That's a rather dramatic statement to make, isn't it? But you see, at one time I too thought there was an energy crisis. After all, that was what I had been told by the news media and by the Federal government. I thought we were running out of crude oil and natural gas. Then I heard, I saw, and I experienced what I am about to write. I soon came to realize that *there is no* energy crisis. There is no need for America to go cold or for gas to be rationed. We shall verify these statements as we provide the facts for you. You might be surprised to find that we will also show why the price of gas

will remain high, and in fact will go higher than it is now.

You've read about the controversy. You've heard the statements, the claims, the counterclaims. You've read about the problems of environmental protection, such as the need to protect birds whose species are becoming extinct. What you haven't heard is that \$2 million dollars was spent to go around the nest of one species. On your property, you'd have moved the nest-not so on the Alaska Pipeline. Not true? Questionable? We'll give you the facts.

You've read about the objections of the native Alaskans whose territory is being exploited by those giant corporations that can never be satisfied. You've heard about the excessive profits made by the oil companies. But you haven't heard about the incredible regulations that forced the costs of the Trans-Alaska oil pipeline up from a projected \$2 billion dollars to beyond \$12 billion dollars. We'll tell you more about that.

I became convinced of the fact that there is no energy crisis when a Senator visited me on the Pipeline. As well as being a former Senator of the State of Colorado, he is also an outstanding Christian gentleman. He came to the Pipeline at my invitation, to speak in the work camps for which I was re-
